

1-2 TONNE

Our range of 1-2 tonne rated aluminium bodies are designed and built to demanding standards. All floors are structural grade aluminium, cabinet panels are 2.5 or 3.0mm aluminium sheet (depending upon application), all joints are sealed with urethane to prevent dust and water ingress, and doors are sealed with pinchweld rubber. A range of high quality locks and hinges are available to select from. Ask us to assist you with our CAD drawing service to help plan your next purchase.
